

Contributing to [project-title]

This project welcomes contributions and suggestions. Most contributions require you to agree to a Contributor License Agreement (CLA) declaring that you have the right to, and actually do, grant us the rights to use your contribution. For details, visit <https://cla.microsoft.com>.

When you submit a pull request, a CLA-bot will automatically determine whether you need to provide a CLA and decorate the PR appropriately (e.g., label, comment). Simply follow the instructions provided by the bot. You will only need to do this once across all repos using our CLA.

This project has adopted the [Microsoft Open Source Code of Conduct](#). For more information see the [Code of Conduct FAQ](#) or contact opencode@microsoft.com with any additional questions or comments.

- [Feature Requests](#)
- [Submission Guidelines](#)

Code of Conduct

Help us keep this project open and inclusive. Please read and follow our [Code of Conduct](#).

Found an Issue?

If you find a bug in the source code or a mistake in the documentation, you can help us by [submitting an issue](#) to the GitHub Repository. Even better, you can [submit a Pull Request](#) with a fix.

Want a Feature?

You can *request* a new feature by [submitting an issue](#) to the GitHub Repository. If you would like to *implement* a new feature, please submit an issue with a proposal for your work first, to be sure that we can use it.

- **Small Features** can be crafted and directly [submitted as a Pull Request](#).

Submission Guidelines

Submitting an Issue

Before you submit an issue, search the archive, maybe your question was already answered.

If your issue appears to be a bug, and hasn't been reported, open a new issue. Help us to maximize the effort we can spend fixing issues and adding new features, by not reporting duplicate issues. Providing the following information will increase the chances of your issue being dealt with quickly:

- **Overview of the Issue** - if an error is being thrown a non-minified stack trace helps
- **Version** - what version is affected (e.g. 0.1.2)
- **Motivation for or Use Case** - explain what are you trying to do and why the current behavior is a bug for you
- **Browsers and Operating System** - is this a problem with all browsers?
- **Reproduce the Error** - provide a live example or a unambiguous set of steps
- **Related Issues** - has a similar issue been reported before?
- **Suggest a Fix** - if you can't fix the bug yourself, perhaps you can point to what might be causing the problem (line of code or commit)

You can file new issues by providing the above information at the corresponding repository's issues link: [https://github.com/\[organization-name\]/\[repository-name\]/issues/new](https://github.com/[organization-name]/[repository-name]/issues/new).

Submitting a Pull Request (PR)

Before you submit your Pull Request (PR) consider the following guidelines:

- Search the repository ([https://github.com/\[organization-name\]/\[repository-name\]/pulls](https://github.com/[organization-name]/[repository-name]/pulls)) for an open or closed PR that relates to your submission. You don't want to duplicate effort.
- Make your changes in a new git fork:

- Commit your changes using a descriptive commit message
- Push your fork to GitHub:
- In GitHub, create a pull request
- If we suggest changes then:
 - Make the required updates.
 - Rebase your fork and force push to your GitHub repository (this will update your Pull Request):
 - `git rebase master -i`
`git push -f`

That's it! Thank you for your contribution!
